## the comprehensive solution in massage systems

Massage system that **provides an accurate and deep massage to the shoulder area**. Its **mobile head technology** allows it to adjust to perfectly fit your back, thus providing a deep neck and lumbar massage.

Exclusive system that **scans 62 points of your back**, adapting the massage programmes to everybody's needs.

The seat pad incorporates a massage system that **improves circulation in the legs**.

An innovative leg massage system capable of a wide range of movements, providing a totally natural massage that **improves circulation**.

## back programmes

- SLEEP** This programme has been designed so that the massage intensity gradually decreases, **helping sleep in a natural way**.
- ANTI STRESS** It covers all the points of the back to achieve a **de-stressing effect**.
- SHIATSU** Recommended for daily maintenance and **muscular recovery**.
- RELAX** Ideal in preparation for a **night's rest**. It stimulates the points necessary to remove the sensation of tiredness.

- DORSAL** It **achieves profound muscle relief** in the **dorsal area** in just a few minutes. Recommended for those who suffer from back problems due to their daily activities.
- NECK & SHOULDERS** It **removes accumulated tension** in the neck zone.
- LUMBAR** Especially for those persons that spend long periods sitting down, providing deep **relaxation of the lower back area**.
- SPORT** Especially recommended before and after a sports session. Use before physical activities to **enhance concentration** and then after to optimize **muscle relaxation**.

## leg programmes

- ANTI CELLULITE** Designed to improve blood circulation in thighs and calves. As a result, a sensation of **lightness in the legs**. It **reduces circulation problems**, helping you rest.

- LEG RELAX** It **works on calves and ankles** providing a sensation of well-being and comfort. Recommended for **daily use**.

# Keyton Cosmo

the massage chair of the future

The design teams at Keyton and Giugiaro Design have pooled their talent to predict the future of massage chairs and have come up with the amazing Keyton Cosmo.

The experience gained over more than 20 years, developing the most sophisticated and exclusive products has culminated in this latest work of art in the world of massage chairs... the Keyton Cosmo.

This model's style combines the sense of harmony provided by its curved arms with a sportier look, creating a unique elegance that satisfies even the most demanding customers. The curved lines of the backrest, continuing the flowing lines of the curved arms, give a feeling of maximum comfort and visual beauty.

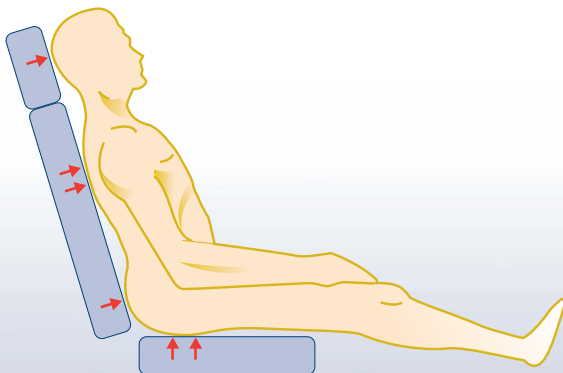

The combination of colours, the finest grain leather and textured finishes provide the ideal finishing touches to this massage chair, which since its conception has become a real technological gem.

## GIUGIARO and the design DESIGN design

Giugiaro Design was created in 1981 by Giorgetto Giugiaro, the group's current president, who directs its highly qualified business staff and professional design team, who work to follow the trends and expectations of international markets.

After over twenty years in design, they have a wide scope of knowledge and experience. The company works in various fields and cooperates with national and international companies such as Fiat Engineering, Bridgestone, Fiera di Milano, LG Electronics, JVC, Nikon, Siemens, Samsonite, Seiko, Telecom and others.

In addition to their headquarters in Turin, they also have operative and/or representative offices in France, Spain, Japan, Russia, Mexico and China.

### Kneading

Reproduces the revitalizing circular kneading massage.

### Tapping

Stimulating massage through the tapping of massage rollers.

### Rolling

### Complete-1

Simultaneous tapping and kneading massage with more kneading intensity.

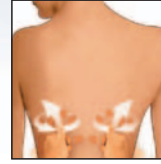

### Complete-2

Simultaneous tapping and kneading massage with the same tapping and kneading intensity.

### Complete-3

Simultaneous tapping and kneading massage with more tapping intensity.

### 3-D Kneading leg

A 3-D massage system enveloping your calves and thoroughly working all your muscles.

massage techniques

# the key to your well-being

Reduces stress

Fights insomnia

Relieves neck pain

Eliminates shoulder tension

Relaxes dorsal muscles

Reduces back pain

Alleviates lower back pain

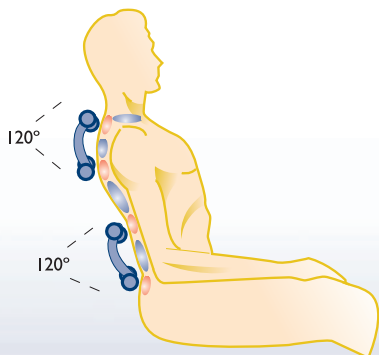

Fights leg tiredness

Stimulates blood circulation

## Conventional technology

The conventional technologies have massage heads with a limited capacity of adaptation which do not allow to reach and relax the muscular zones of difficult access, like for instance the shoulders and the neck.

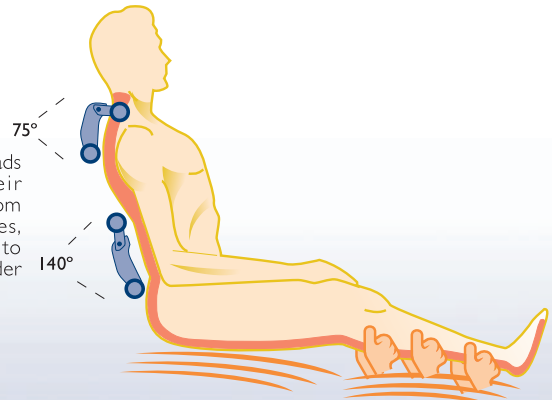

The massage heads have a 120° fixed angle.

## Keyton Sensor FT2® technology

Thanks to the new mobile-head massage system, our exclusive technology Keyton Sensor FT2® is the first technology with auto-adaptation capacity on the shoulder area. This enables a precise and deep massage on the neck and shoulder area which results in a relaxation never reached before.

The new mobile heads can change their massage position from 75° to 140° angles, which allows them to adapt to the shoulder and neck zones.

## 3D massage system

An innovative leg massage system capable of a wide range of movements, providing a totally natural massage that improves circulation.
